

Video Capture Analysis Platform (VideoCAP)

NEXT-GENERATION VIDEO SURVEILLANCE SOLUTION

Whether you are looking to replace an existing camera infrastructure, an aging video management software, or the infrastructure required to support your data retention needs, VideoCAP (Video Capture Analysis Platform) can scale with you. From a few cameras and biometric endpoints up to the thousands, Government Acquisitions Inc. (GAI) VideoCAP solution can provide the ability to safely capture, assess, and react to situations as they happen, not after the fact.

Partnering with industry-leading OEMs, GAI provides a solution that finally allows security administrators to focus on security rather than the technology enabling it. VideoCAP is a flexible, enterprise class architecture that can be used in the most robust video surveillance environments. By combining the award winning NeoFace Watch by NEC, the purpose built Isilon storage platform from Dell Technologies, and the VisionHub software by Qognify, today's security leaders can be certain they are doing everything possible to ensure the safety of both physical and human assets.

GAI VideoCAP solution:

- ▶ A complete Video Management Solution for continuous monitoring and recording of security camera footage
- ▶ Next generation analytics platform for real time video surveillance
- ▶ Award-winning Suspect Search enables you to locate and track specific people and objects
- ▶ Operational Intelligence – turn large amounts of video data into actionable intelligence for a proactive incident response system
- ▶ Empower mobile users with the ability to record and send live video streams from their mobile devices

REAL-TIME DETECTION

Physical security endpoints, people and assets provides a safer environment.

SCALABLE ARCHITECTURE

Designed with performance, scale, and ease of use with video security in mind from the ground up.

INCREASED EFFICIENCY

Management tools allow security administrators to focus on the tasks at hand rather than the underlying technologies.

ENABLING BIG DATA ANALYTICS FOR THE PHYSICAL SECURITY MISSION

GAI brings over 25 years of dedication to Federal mission success and a performance culture to power real innovation.

ADVANCED AGENCY AWARENESS

GAI's VideoCAP solution provides agencies with a next generation video capture and analysis solution designed to give security administrators the latest in industry surveillance tools, without sacrificing their time to manage the underlying technologies.

DEDICATED TO YOUR SUCCESS FOCUSED ON SUPPORTING YOUR MISSION

GAI delivers the expertise to power Federal innovation. Changing course on a dime? No problem. As you enhance your cyber security strategies to detect and prevent in real time – we know it's all about the mission. Protecting citizens. Supporting critical infrastructure. Delivering cutting-edge research and development. GAI is dedicated to empowering Federal missions with new efficiencies and agility. We deliver:

- ▶ Advanced capabilities with competitive pricing
- ▶ Mature, pragmatic, and collaborative team
- ▶ World-class partner ecosystem including:

DEDICATED TO RESULTS

A mission mindset is in our DNA. We understand that success is driven by partnership, process, and technology. GAI's experienced team members work side-by-side with Federal IT executives and industry-leading OEM partners to modernize, optimize, and deliver unparalleled mission support.

FOCUSED ON YOUR MISSION

GAI's VideoCAP solution helps agencies instantly analyze video surveillance information in real-time. With its cost-efficient and timely architecture, Feds can spend less time putting the pieces together, and more time on the mission at hand.
