Artificial Intelligence

BUILD THE FUTURE WITH ARTIFICIAL INTELLIGENCE

Artificial Intelligence (AI) and deeply coupled technologies including Machine Learning (ML), Deep Learning (DL), and Robotic Process Automation (RPA) will foundationally transform almost every aspect of our lives over the next 5 years. The U.S. is in significant danger of falling behind in terms of focus in this area, as evidenced by the recent Executive Order on this topic. The bipartisan effort behind it requires agencies to develop plans to set up internal efforts to keep the U.S. ahead of our international competitors. In the last available reporting period, U.S. federal spending on Research & Development (R&D) in this vital area grew by 40% to $116B last year. While that is a large number, evidence indicates that competitive nations are investing even more heavily. GAI believes that simply investing dollars without results is not the solution. We have developed a portfolio of solutions and training that drives toward retaining U.S. dominance in this area and assisting agencies in:

▶ Providing better intelligence, surveillance, and reconnaisance

▶ Improving Platform Sustainment

▶ Reducing fraud, waste, and abuse

▶ Predicting and blocking advanced cyberattacks

▶ Improving patient care

AUTOMATION & MISSION EFFICIENCY
Augment, provide assistance to, or perform tasks independently from humans.
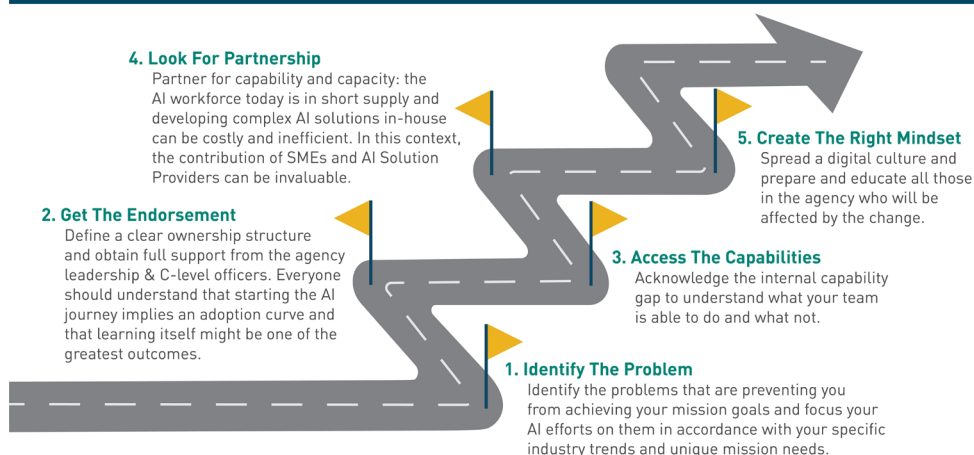

PRODUCTIVITY GAINS
Massive improvements in human productivity and economic outcomes.

PREDICTIVE DATA ANALYTICS
Dynamic & Predictive Risk Analysis, and anomaly detection on massive datasets.

Roadmap to Success for AI Enabled Agencies

4. Look For Partnership
Partner for capability and capacity: the AI workforce today is in short supply and developing complex AI solutions in-house can be costly and inefficient. In this context, the contribution of SMEs and AI Solution Providers can be invaluable.

5. Create The Right Mindset
Spread a digital culture and prepare and educate all those in the agency who will be affected by the change.

2. Get The Endorsement
Define a clear ownership structure and obtain full support from the agency leadership & C-level officers. Everyone should understand that starting the AI journey implies an adoption curve and that learning itself might be one of the greatest outcomes.

3. Access The Capabilities
Acknowledge the internal capability gap to understand what your team is able to do and what not.

1. Identify The Problem
Identify the problems that are preventing you from achieving your mission goals and focus your AI efforts on them in accordance with your specific industry trends and unique mission needs.

What is GAI Doing to Enable AI?

AI EDUCATIONAL WORKSHOPS

▶ AI Workshop & Market Research for Business, and Decision Makers & Technical Decision Makers

AI TECHNOLOGY & SOLUTION ENABLEMENT

▶ AI Ready Technology Bundles, Full Solution Stack, Solution Design, and Proof of Concepts

PROFESSIONAL SERVICES

▶ Professional Services, Project Management, Technology Lifecycle Management, Subject Matter Experts, and Ongoing Support

CONTRACT VEHICLES & PROCUREMENT

▶ GWACs, NASA SEWP-V, ITES-3H, CIO-SP3, DHS First Source, and OTAsZ

DEDICATED TO YOUR SUCCESS

A mission mindset is in our DNA. We understand that success is driven by partnership, process, and technology. GAI's experienced team members work side-by-side with Federal IT executives and industry-leading OEM partners to modernize, optimize, and deliver unparalleled mission support.

GAI delivers the expertise to power Federal innovation. Changing course on a dime? No problem. As we help you on your artificial intelligence journey – we know it's all about the mission. Protecting citizens. Supporting critical infrastructure. Delivering cutting-edge research and development. GAI is dedicated to empowering Federal missions with new efficiencies and agility. We deliver:

▶ Advanced capabilities with competitive pricing

▶ Mature, pragmatic, and collaborative team

Government Acquisitions

FOCUSED ON YOUR MISSION

GAI's artificial intelligence solutions help agencies reduce fraud, track threats, and analyze information in a cost-efficient and timely manner, so Feds can spend less time sorting information, and more time on the mission at hand.
