Artificial Intelligence (AI) and deeply coupled technologies including Machine Learning (ML), Deep Learning (DL), and Robotic Process Automation (RPA) will foundationally transform almost every aspect of our lives over the next 5 years. The U.S. is in significant danger of falling behind in terms of focus in this area, as evidenced by the recent Executive Order on this topic. The bipartisan effort behind it requires agencies to develop plans to set up internal efforts to keep the U.S. ahead of our international competitors.

In the last available reporting period, U.S. federal spending on Research & Development (R&D) in this vital area grew by 40% to $116B last year. While that is a large number, evidence indicates that competitive nations are investing even more heavily. GAI believes that simply investing dollars without results is not the solution. We have developed a portfolio of solutions and training that drives toward retaining U.S. dominance in this area and assisting agencies in:

- Providing better intelligence, surveillance, and reconnaissance
- Improving Platform Sustainment
- Reducing fraud, waste, and abuse
- Predicting and blocking advanced cyberattacks
- Improving patient care

**BUILD THE FUTURE WITH ARTIFICIAL INTELLIGENCE**

**AUTOMATION & MISSION EFFICIENCY**
Augment, provide assistance to, or perform tasks independently from humans.

**PRODUCTIVITY GAINS**
Massive improvements in human productivity and economic outcomes.

**PREDICTIVE DATA ANALYTICS**
Dynamic & Predictive Risk Analysis, and anomaly detection on massive datasets.
A mission mindset is in our DNA. We understand that success is driven by partnership, process, and technology. GAI’s experienced team members work side-by-side with Federal IT executives and industry-leading OEM partners to modernize, optimize, and deliver unparalleled mission support.

GAI delivers the expertise to power Federal innovation. Changing course on a dime? No problem. As we help you on your artificial intelligence journey — we know it’s all about the mission. Protecting citizens. Supporting critical infrastructure. Delivering cutting-edge research and development. GAI is dedicated to empowering Federal missions with new efficiencies and agility. We deliver:

- Advanced capabilities with competitive pricing
- Mature, pragmatic, and collaborative team

FOCUSED ON YOUR MISSION
GAI’s artificial intelligence solutions help agencies reduce fraud, track threats, and analyze information in a cost-efficient and timely manner, so Feds can spend less time sorting information, and more time on the mission at hand.
