SEWP VI General Overview

The SEWP VI Contract (Solutions for Enterprise-Wide Procurement) is a government-wide acquisition contract (GWAC) for Information Technology products and services. It is an indefinite delivery, indefinite quantity (IDIQ) contract, for use by all Federal Agencies and approved federal agency support contractors. Starting on November 1, 2026, SEWP VI has Maximum value of $20 Billion USD and a performance period of 10 years (5 base and one 5-year option).

SEWP VI is designed to provide a broad suite of Information Technology, Communication and Audio Visual (ITC/AV) solutions and services. Technology is ever-evolving and for that reason, SEWP's processes enable all Contract Holders to add new commercial technology and IT services to their contract daily, as requested by our customers. The focus of SEWP VI is on the full suite of technology offerings that simplify Federal Agency access and Industry offerings across the entire ITC/AV solutions and services landscape.

The SEWP VI Program Management Office manages the SEWP VI Program and applies a small administration surcharge (.34%) on all contract orders. The SEWP VI administration surcharge shall not be shown separately and must be included as part of the item pricing.

SEWP VI recommends utilizing the Quote Request Tool (QRT) and Marketing Research Tool from their website (www.sewp.nasa.gov/sewpvi) to assist customers with their buying decisions. Fair Opportunity FAR 16.50(b) (1) provides that each contractor shall be given fair opportunity to be considered for each order exceeding $10,000 and issued under multiple award contracts. By using the Quote Request Tool, customers are not required to obtain 3 quotes as long as all Contract Holders within a group or set-aside were provided the opportunity to provide a quote.
